VANDIT JAIN

New Delhi, India | +91 9212613241 | vanditjain921@gmail.com

PROFESSIONAL SUMMARY

Strategic Backend Software Engineer with 3.5+ years of experience specializing in Golang and microservices architecture. Expert in collaborating with Architects, UX Designers, and Product Managers to design and scale SaaS-based offerings. Pioneer in AI-augmented engineering, leveraging LLMs (Gemini, Claude, Codex) to accelerate development cycles and ensure high-velocity delivery.

TECHNICAL SKILLS

Languages	Golang, JavaScript, HTML, CSS
Frameworks	Gin, Fiber, GORM, Echo, Gorilla/Mux, Chi
Backend	Microservices, gRPC, REST APIs, Kafka, Distributed Systems, Circuit Breaker Pattern
Databases	PostgreSQL, Redis, MongoDB
Cloud & DevOps	AWS (Lambda, CloudWatch), Docker, Kubernetes, Grafana, Elastic (ELK Stack), CI/CD, TDD
AI Tools	Gemini, Claude, Codex, AI-Assisted SDLC Optimization

WORK EXPERIENCE

RemoteState | Software Developer

June 2023 – Present

- **Engineering Leadership:** Mentor junior developers through structured code reviews and technical guidance, driving a culture of high engineering standards.
- **AI-Augmented Development:** Leverage advanced AI models (Gemini, Claude, Codex) to accelerate the software development life cycle (SDLC), optimizing code generation and debugging to increase deployment velocity.
- **Cloud Observability:** Leveraged AWS Lambda and CloudWatch for serverless execution; built real-time observability dashboards using Grafana and Elastic.
- **Database Architecture:** Designed high-performance MongoDB schemas and optimized PostgreSQL queries, resulting in a 15% increase in query efficiency.

TECHNICAL PROJECTS

CATENA CLEARING - Telematics Integration Platform

- Architected a scalable data pipeline in Go to normalize high-volume telematics data from 190+ providers.
- Utilized AI-assisted development tools to rapidly prototype and validate standardized JSON schemas for real-time telemetry processing.

E-MOBILITY (Panasonic) - National EV Rental Platform

- Architected the REST API backbone for dual-application ecosystem (Customer-facing ride-hailing and Driver-side onboarding/registration).
- Engineered an Operator Dashboard for fleet management, enabling real-time battery health tracking, vehicle telemetry, and inspection report workflows for maintenance and damage cost recovery.
- Reduced API latency by 20% through advanced database indexing and optimized distance calculation logic.

PRECIUM - Revenue Optimization Tool

- **Technical Lead:** Served as the primary technical point of contact for clients, translating business requirements into technical roadmaps and project features.
- Led sprint planning and team discussions to resolve production bottlenecks and execute new feature rollouts for the dynamic pricing engine.

FITPASS - Fitness Infrastructure Platform

- Integrated third-party APIs to enable real-time workout tracking, including posture correction analysis and goal-oriented exercise recommendations.
- Developed backend modules for automated diet intake monitoring and diet chart management, facilitating seamless consultation between users and in-house dieticians.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (CSE) | 2023
Bennett University (Times of India Group)
